ODAT Proposal Submission Form

Instructions:
- Content must fit in the space provided.
- Please do not alter or re-create this form. Any submissions in other formats may not be reviewed.

1. Project Title

2. Project PI

3. Institution

4. Provide a brief description of the future product or service that you envision your project will lead to.

5. What is the health disparity being addressed?

6. How will the new innovation address this health disparity, and what advantages does it have over solutions that are currently available or in development?

7. Briefly describe the previous work that supports development of the innovation into a scalable product or service. References/citations and supporting data are optional and may be uploaded as separate files in the REDCap submission form. Please do not include figures in the text box below.

8. Describe what work needs to be done to advance the innovation to the next key development stage. Include an estimate of cost and timeframe to complete this work.

9. After this work has been completed, what are the anticipated next steps to continue advancing the innovation towards a product or service?

10. Please list the proposed project team members and their roles in the project. Include name, institution, expertise and specific project role/contribution.

11. If the innovation has been disclosed to the UMN Technology Commercialization office, please include disclosure number, assigned technology portfolio manager, and brief summary of the current status of intellectual property protection.

12. Please list any previous or current support for this project (both sponsored and unsponsored). Include the source, funding amount, award period and status.
